

TAKE CHARGE OF THE VISUAL IDENTITY - AND SAVE TIME

WordEngine

Do you need a tool which ensures that your organisation presents itself with a consolidated image through all the Word documents that are produced daily in the organisation? And a tool that also saves time in the laying out of the various documents?

WordEngine is a unique solution for Microsoft Word, which matches both needs. You can read more about WordEngine's features here. WordEngine always adapts to specific requirements and demands.

With WordEngine, efficiency in working with Word is increased significantly and therefore you will find that your investment quickly pays for itself.

Consistent visual identity

Do you want to communicate with greater conviction? Producing various Word documents is often a large part of your employees' daily work. WordEngine is a unique tool for Microsoft Word which ensures that your organisation is presented with a consistent image through the Word documents that are sent out from the organisation. In this way, greater impact is achieved with the organisation's communication.

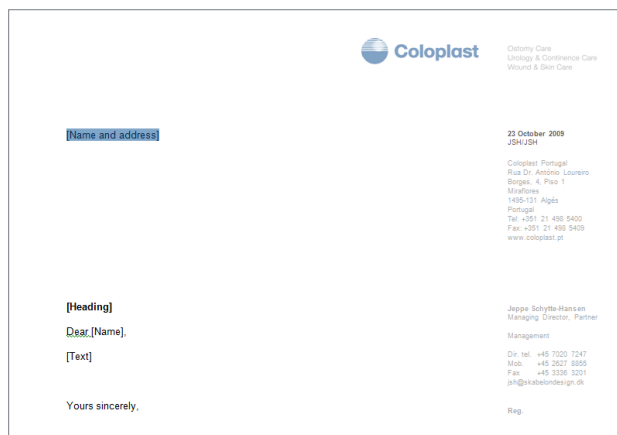

SkabelonDesign develops templates and Brand Management Tools for Microsoft PowerPoint, Word, Excel and Outlook with two goals in mind; to promote a strict application of the visual identity in the organisations' communication as well as streamline employees' work with Microsoft Office.

Our solutions; PresentationEngine, WordEngine, ExcelEngine and CorporateSignature, are unique tools that help users to prepare and professionalize work in Microsoft Office.

Would you like to communicate with greater consistency? Producing various Word documents is often a large part of your employees' daily work. WordEngine is a unique tool for Microsoft Word which ensures that your organisation is presented with a consistent image through the Word documents produced within your organisation. This will ensure a greater impact throughout your communication.

Attractive and professional Word documents

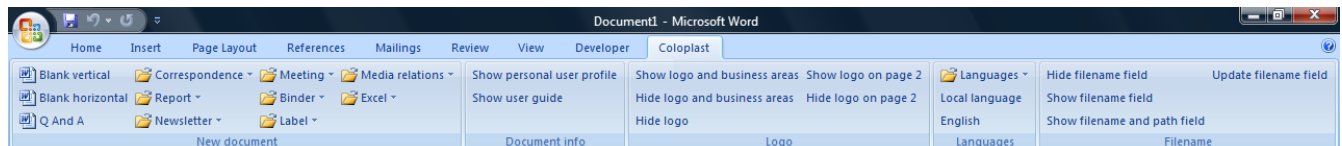

Which templates do you need? WordEngine can handle a large number of templates such as letters, memos, minutes, newsletters and reports. Your employees do not need to be experts in either Word or graphic design in order to layout attractive and professional Word documents in a short space of time.

Documents created on the basis of the templates in WordEngine automatically respects the corporate design guidelines.

Full integration into Word

WordEngine is integrated directly into Microsoft Word as an extra menu point with your organisation's name. Through the menu point, the users have access to existing standard documents, all Word templates and the user-friendly functions. Therefore, employees do not have to search for the latest updated templates, images, etc.

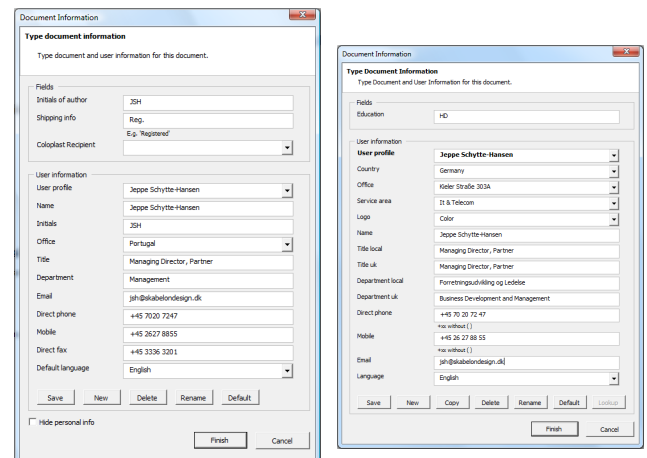

From a customized tab in Word you can access pre-formatted Word documents and dynamically enter user data, location, logo, language, and so on, to the document you are working on.

Image editing

Would you like to save time on image editing and correct placement in Word documents? Now, your employees no longer have to spend unnecessary time editing images and placing them correctly in Word documents. WordEngine contains user-friendly functions that make it easy for employees to add and insert images in the correct size and format.

User-friendliness

Do you need a tool that makes working in Word noticeably easier? With WordEngine you can switch between many sender and recipient addresses and switch between various languages. Moreover, you can easily remove or add logos and other graphic elements and therefore make use of both pre-printed and blank stationery.

Enter user information for the specific document into the dialog box or retrieve user information directly from AD, XML, or other.

SkabelonDesign has 480,000 users worldwide, made up of small, medium and large organisations. Our solutions are used by A. P. Moller-Maersk, Carlsberg, Coloplast, Danisco, Confederation of Danish Industry, DONG Energy, Egmont, FLSmidth, The National Danish Police, Rambøll, The Capital Region, TDC, VELUX, Vestas and 6 ministries and 8 municipalities.
